Football Season Opens Tonight

RED DEVILS TANGLE WITH ST. FRANCIS ELEVEN

Local football followers will get their first glimpse of the East Jordan High School "Red Devils" at Traverse City this Friday evening, when the 1952 aggregation opens its eight game schedule meeting Class C St. Fransis under the lights.

Coach Saxton's forces were dealt a severe blow in scrimmage Monday night when Gordon Danforth, 6'2", 185 lb., senior, fullback was injured. It is doubtful if the hard-hitting back will be in uniform for some time. Danforth, a standout on defense had developed into the type of spinning fullback necessary in the Jordan type of single wing offense.

Little is known of the strength of the Traverse City St.Fransis eleven other than its football fortunes have been on the upgrade during recent years. It is the first meeting of the two schools on the gridiron.

With the loss of Danforth, Coach Saxton has had to alter his starting lineup. Probable starters on offense are; Keith Evans, Q., Sam Milstein L.H., Ray Gee R.H., and Robert Romback F. Lineman likely to get a starting call include James Weisler and Leon Bartlett, ends; Dick Freeman, Bill Rogers or James Sherman, tackles; James Shepard and Peter Nemecek, guards; and Larry Chanda, center. The defensive lineup should East Jordan kick off will more than likely find Weisler and Freeman at the ends, Shepard and Chanda at tackle positions, Floyd Detloff and Jack Zoulek, guards; Robert Romback at center. The starting backfield on defense will be Evans at fullback, Gee and Milstein at the halves, and Bartlett at quarterback.

Conservation Studies at Petoskey—Traverse City This Fall

The conservation of soil, forests, minerals, scenic areas, natural pastures, and wildlife, all important natural resources in Michigan, will be studied in a course to be offered in Traverse City and Petoskey this fall by Robert D. Brackett, Jr., newly appointed supervisor of the Extension program in Northwestern Michigan. The course is one of several planned for the Northern part of the State this year.

A feature of the course, which is Conservation of Natural Resources (gc Forestry W-194) will be two six-hour field trips on which the class members can observe conservation practices. Regular class sessions will include lectures, discussions and films. Mr. Brackett, who has had unusual opportunities to study conservation practices both here and aboard, plans to make this practical course for teachers as well as for others who are interested in the conservation of the natural beauty and productivity of the State.

The class will open in Petoskey on Tuesday, September 23, at the high school, and in Traverse City on Wednesday, September 24, at Northwestern Michigan College. Both classes are scheduled to meet from 6:30 to 9:30 p.m. Because of the field trips, the course will be completed by mid-December.

The class will also be offered in Gaylord and Cadillac in the spring semester.

The first real flight north of Grand Rapids took place on the ground Wednesday afternoon. Call Attention To New Laws On Air Guns, Phones

The Michigan State Police are calling attention to two amendments of state laws, effective Thursday, September 18, one adding gas or air guns to the definition of firearms and the other regulating the emergency use of party telephone lines.

The amendment to the firearms law adds gas or air guns, but not the so-called BB gun, to the definition of firearms. This means that the purchaser of such a gun must be a citizen of the United States, a resident of the State of Michigan for at least six months and 21 years of age or older. Such guns also must be registered and permits obtained to carry them, the latter being issued or rejected by the county concealed weapon licensing board.

The amendment to the penal code covering telephones makes it a misdemeanor to refuse to yield or surrender the use of a party line in order to permit the reporting of a fire or summoning police, medical or other aid in cases of emergency. The amendment also provides that telephone directories must carry a notice explaining the offense. Failure to yield party lines in the past has resulted in some tragic consequences.

New Liquor Law Effective Sept. 18

A warning that strict enforcement has been promised for a new law affecting teen-agers possessing liquor in automobiles was issued today by the Michigan Liquor Control Commission.

The law becomes effective September 18, and the commission calls attention to the people of the state, especially those who have minor children, to the amendment adopted by the 1952 Legislature.

Police and sheriffs' departments will institute a campaign of rigid enforcement and prosecuting attorneys will seek severe penalties at the request of the Liquor Commission.

"We feel," the Commission explained, "that enforcement of this law will do much to reduce the number of motor vehicle accidents caused by minors who have been drinking and driving, and also will suppress drinking by minors in parks, around dance halls in rural areas and at drive-in's in urban communities."

The law effective September 18 makes it a misdemeanor for any person under the age of 21 to purchase or knowingly possess, transport or have under his control in any motor vehicle, beer, wine, whiskey or other spirits.

The penalty is 90 days in jail or $100 fine or both.

In further commenting, the Liquor Commission said:

"This law has been interpreted to mean that the minor driver of any automobile can be arrested and charged with a misdemeanor if any alcoholic beverage, including beer or wine, is found in the car he is driving, regardless of whether he made the purchase.

Even though it is not his car, the driver will be subject to prosecution if any alcoholic drinks are found, whether they were bought by him or brought into the car by a passenger. The mere presence of alcoholic beverages in the automobile with the knowledge of the driver will be prima facie evidence of guilt."

The law exempts minors working for a licensee of the Liquor Control Commission and "possessing, transporting or having such alcoholic beverages in a motor vehicle under his control during his regular working hours and in the course of his employment."

In an attempt to warn all youths affected, and their parents, the Commission is seeking widespread publication of its announcement.

In addition, letters and bulletins about the new law are being sent to all high school principals and officials of colleges and universities, asking that notices be posted on bulletin boards and supervisory personnel call attention to the penalties for violation, as well as the careful enforcement program which has been planned beginning with the effective date.

The Servicemen's Letter

Hi Fellas:

Last week I carried on about the club that is sending these papers to you and all the time I was naming the club wrong. The proper name is "Community Service Club". Is seems that for this time at least I was about as confused as other people who you talk with about all of these community clubs and chests thaht are being promoted.

Congratulations to Niles Hill on receiving another stripe. Niles is now Cpl and has made the grade for the first string football squad from his camp. This Saturday they play against Bremington Navy in Seattle, Washington. Niles says that he thought he was pretty big but when he gets up alongside of the beef they have in those Navy teams he feels pretty small. Niles is with Co F, 369 EASR, Fort Worden, Washington.

Bob Graham has a change of address within the same camp. His new address is: Pvt. Robert C. Graham, RA 16 417 451, Btry B, 58th AAA AW Bn, 5th Armored Division, Camp Chaffee, Arkansas.

The Public Information Office at Camp Chaffee sent along an article on Bob Graham this week and also one on Dick Sommerville. Here they are. "Pvt Robert C. Graham has been selected to attend the 5th Armored Divisions clerk-typist school. During the eight-week school, he will take 22 courses on Army Administration, plus a complete course in typewriting." And the one about Dick — "Pvt Richard E. Sommerville, has been selected to attend the 5th Armored Division's radio operators school. During the 12-week course Pvt Sommerville will receive ten weeks of classroom study. His final two weeks will be spent in the field in practical operation of code and voice radio sets."

Stanley Antoine has finished his Basic at Lackland AFB and has moved to this new address: A/3C Stanley Antoine, AF 16 417 102, Sqd 3751, Brks 897, Sheppard Field, Wichita Falls, Texas. What are they lining you up for, Stan? Radio or mechanics?

After losing trace of Alfred Hosler in Fort Custer we've located him down in Camp Atterbury. His address now is: Pfc Alfred D. Hosler, RA 16 366 045, Co G, 167th Infantry, Camp Atterbury, Indiana. Al, in case you get lonesome for someone from home you can find Everett Vermillion over in Co C, 467 Chemical Mortar Bn. I don't know whether you know him or not but he's a good East Jordan rooter.

I have word here that Ellery Inman is home this week.

Here's a new address — A/B James E. Raymond, AF 16 425 729, Flight 1053, Sqdrn 3707, Lackland AFB, San Antonio, Texas. Jim went in with Dave Vallance on August 18th and has just now reported in. I presume that Jim and Bave are near each other but just to make sure that Jim finds the others down there here are their addresses: Dave Vallance is in Flight 1049, Sqd 3706 — and Bill Anderson is in Flight 1070, Sqd 3703. Here's hoping you three men have time enough to get together once or twice before finishing basic at Lackland.

The Marines have landed — in the person of Dave Wade. Dave has finished his electronics training in Memphis at the NATTC there and is now home on an 18 day leave enroute to El Toro, California — the old stamping grounds of Bud Strehl. He is due at El Toro on October 5th. Have you any tips to give Dave about his new duty station, Bud? Dave says that this electronics training that he just completed is a pretty tough course. They taught operation, maintenance, and construction of all types of electronic equipment from simple radio up to radar. He was just a little disapointed in the ratings they are handing out too. Dave is still Pfc when he figured he should be a buck at least.

Jerry McKenney and Wayne Flora are both home now. Jerry was in last week to give a little of the low-down on how much longer he is going to be tied up the Army and just when he expects to be free (?) civilian again. He is is now home on a 22 day furlough that will end on Oct. 2nd. when he is supposed to report back for duty. He is due to receive his discharge sometime around October 12th — depending on when the Army gets all the red tape out of the way. Jerry says that he has had all of the GI life that he wants. He doesn't like those other guys shooting at him. No thirty year man for him. I can't say I blame him. We can use another good farmer around here.

Glen Persons checks in from Norfolk with the following letter: "Hi Jake — I made up my mind tonight that I was going to drop you a few lines if it killed me — so here goes. As you can on this workhorse of the Navy. Getting to be an old-timer on here now. When I came aboard sixteen months ago about ninty percent of the crew were reserves and by now have gotten out. So us guys who came aboard then are the old-timers on the tub.

'I see by last week paper you said I was expecting to go to Germany. It was a silght mistake as we had just gotten back when I went home for that weekend. We were gone a month, but only in "Bremerhaven" for three days, as the rest of the time was spent traveling. I only had one liberty there, but from what I saw, Germany is a beautiful country. I have been in quite a few foreign countries since I came in here, but have yet to find one any cleaner or prettier. It would take a lot to beat these people as far as cleanliness is concerned. I might add that as a whole the people were very friendly. Of course you can still see resentment in some of their eyes, but that has to be expected.

'While I'm on the subject of this trip I would just like to mention the beautiful sight it is to enter the English Channel and be able to view the "White Cliffs of Dover". You have probably seen them and can back me up when I say it is one of the most beautiful sights a person could see.

'Before we left for Germany we spent about five weeks down in "Guantanama Bay" Cuba on a retraining course after coming out of drydock. The cruise was pretty rough as it meant a lot of G.Q., General Drills and etc. We spent the 4th of July weekend in Kingston, Jamaica, which was very nice. We took some of the men and their wives, who are stationed on the base at "Gtmo" with us. I never thought, when I came in the Navy, that we would be carrying women, but as I've always said, "In here — anything can happen".

'We are leaving Friday for a two months operation in Vieques, Puerto Rico so you can keep sending my paper Air Mail, which incidentally is really swell service. It makes the distance from home seem a lot shorter when you can have your paper two or three days after it's printed.

'I'm still up here on the "Singnal Bridge". We haven't heard yet whether we passed our test for third class or not, but here's hoping. When there is matrimony in the air a fellow can use that extra money. (yes man)"

Thanks for the interesting letter, Glenn. I can't back you up on that White Cliffs stuff though. You see, both times that I was in the channel it was so foggy that we couldn't see more than a couple of hundred yards. I guess I missed a beautiful sight. About "Tuck Thompsons address — I've had the same experience as you. Our papers have been returned also. And to date we have had no further word on him. When I get another line on him you'll hear of it right away.

We here in East Jordan were all saddened this week by the news of the untimely death of Robert Nemecek. Bob was killed in an automobile accident while on pass from Camp Polk. I'm sure all of you servicemen will join with us here at home in extending our utmost sympathy to Bob's family.

So Long,
"Jake" Snyder

Hard Dough Stage Best For Cutting Corn For Storage

For the highest yield of good quality silage, corn should be cut when the grain is in the hard dough stage and when most but not all of the kernels have dented.

That's the advice of E.C. Rossman, farm crops department researcher at Michigan State College. He also says that corn should not be picked for cribbing until the ears have dried down to not more than 25 to 27 percent moisture for the best yield of high quality grain.

Corn can safely be picked for cribbing in narrow cribs, about 4 feet wide, at about 25 percent moisture. When picked and cribbed at a high moisture content, there may be spoilage, especially when the temperature is above freezing. Corn at 30 to 35 percent moisture may be safely stored if artificially dried before cribbing.

Back to the silage subject, Rossman explains that if corn is cut when the grain is in the hard dough stage and most of the kernels have dented, the total moisture in the plant will be enough for preservation of good silage. At that time the grain will contain about 45 to 50 percent moisture and the fodder will contain 75 to 80 percent water.

Cutting corn for silage before this stage results in less grain in the silage and less total dry matter per acre. If harvested too late, the silage may be too dry and difficult to preserve without spoilage.

Leave safety shields off your machinery if you want to get all wrapped up in your work.

The Raccoon

Racoon, pirate, pet, predator, prize or pest. So varied are the relationships between men and racoons that you may take your choice for a single designations. Teddy Roosevelt built his Bull Moose party about a wild animal. This being an election year we found Senator Kefauvers following his example and using the coon skin cap as campaign symbol. The fate of the Senator's ambitions matters little to the coon who seems able to survive dogs, traps, civilization, fire, hunters and almost anything. Even the rage of college boys for coon skin coats did not wipe the animals out of their range over our whole country.

When a country boys in his early spring wanderings finds what look like the prints made by little 2 x 4 inch hands in the mud along the creek he has a hunch that the coons have come

out of hibernation. If he is a careful observer he looks for one track of a woodchuck rather than a coon.

Raccoons breed in February just after coming out of their hibernation. In 63 days two to six young are born of the union and both parents take part in the success of the little family which may remain as a group through the first winter. By the first winter a young coon may have reached a weight of 12 pounds. Two hundred acres of suitable woodland should yield an animal crop of one raccoon in spite of the normal accidents of nature. A full meal may be about ½ pounds of fish but it may be an equivalent in crayfish, insects, sweet corn or vegetables. We hope this clown of our neighborhood never vanishes off our home range. If he does we will move to his just for the fun of it. Without prejudice for or against Senator Kefauver's political future the National Wildlife Federation of Washington, D. C., this year elects his political symbol, the raccoon, to its 1952 Hall of Fame — its remarkable popular wildlife stamp series. By E. Laurence Palmer.

Pfc. ROBERT NEMECEK DIES IN AUTO ACCIDENT

INCIDENT OCCURS NEAR CAMP POLK, LA.

Mr. and Mrs. Edward Nemecek Sr. received word last Saturday from military authorities at Camp Polk, La., that their son, Pfc. Robert Nemecek, was killed in an automobile accident near Eunice, La.

Companion, Pfc. Emilian Rakolta, of Highland Park, Michigan, riding with Nemecek was critically injured. He was taken to a Lake Charles hospital where he died a short time later.

Authorities said that in swerving to avoid a parked truck, the soldiers' car collided head-on with an oil field truck. The truck driver was uninjured.

Bob was a graduate of East Jordan High School, class of 1947, and had worked in Detroit prior to entering the service in March of 1951. Since then he has been stationed, most of the time, at Camp Polk. He was 23 years old.

Football Season Opens Tonight

RED DEVILS TANGLE WITH ST. FRANCIS ELEVEN

Local football followers will get their first glimpse of the East Jordan High School "Red Devils" at Traverse City this Friday evening, when the 1952 aggregation opens its eight game schedule meeting Class C St. Fransis under the lights.

Coach Saxton's forces were dealt a severe blow in scrimmage Monday night when Gordon Danforth, 6'2", 185 lb., senior, fullback was injured. It is doubtful if the hard-hitting back will be in uniform for some time. Danforth, a standout on defense had developed into the type of spinning fullback necessary in the Jordan type of single wing offense.

Little is known of the strength of the Traverse City St.Fransis eleven other than its football fortunes have been on the upgrade during recent years. It is the first meeting of the two schools on the gridiron.

With the loss of Danforth, Coach Saxton has had to alter his starting lineup. Probable starters on offense are; Keith Evans, Q., Sam Milstein L.H., Ray Gee R.H., and Robert Romback F. Lineman likely to get a starting call include James Weisler and Leon Bartlett, ends; Dick Freeman, Bill Rogers or James Sherman, tackles; James Shepard and Peter Nemecek, guards; and Larry Chanda, center. The defensive lineup should East Jordan kick off will more than likely find Weisler and Freeman at the ends, Shepard and Chanda at tackle positions, Floyd Detloff and Jack Zoulek, guards; Robert Romback at center. The starting backfield on defense will be Evans at fullback, Gee and Milstein at the halves, and Bartlett at quarterback.

Conservation Studies at Petoskey—Traverse City This Fall

The conservation of soil, forests, minerals, scenic areas, natural pastures, and wildlife, all important natural resources in Michigan, will be studied in a course to be offered in Traverse City and Petoskey this fall by Robert D. Brackett, Jr., newly appointed supervisor of the Extension program in Northwestern Michigan. The course is one of several planned for the Northern part of the State this year.

A feature of the course, which is Conservation of Natural Resources (gc Forestry W-194) will be two six-hour field trips on which the class members can observe conservation practices. Regular class sessions will include lectures, discussions and films. Mr. Brackett, who has had unusual opportunities to study conservation practices both here and aboard, plans to make this practical course for teachers as well as for others who are interested in the conservation of the natural beauty and productivity of the State.

The class will open in Petoskey on Tuesday, September 23, at the high school, and in Traverse City on Wednesday, September 24, at Northwestern Michigan College. Both classes are scheduled to meet from 6:30 to 9:30 p.m. Because of the field trips, the course will be completed by mid-December.

The class will also be offered in Gaylord and Cadillac in the spring semester.

It was pulled off late Friday afternoon out back of the Floral hall the two poor "Blind" men, who worked the grounds during the four days, were discovered with their glasses off assiduously matching the pennies that they had received from their hard earned toil.

Call Attention To New Laws On Air Guns, Phones

The Michigan State Police are calling attention to two amendments of state laws, effective Thursday, September 18, one adding gas or air guns to the definition of firearms and the other regulating the emergency use of party telephone lines.

The amendment to the firearms law adds gas or air guns, but not the so-called BB gun, to the definition of firearms. This means that the purchaser of such a gun must be a citizen of the United States, a resident of the State of Michigan for at least six months and 21 years of age or older. Such guns also must be registered and permits obtained to carry them, the latter being issued or rejected by the county concealed weapon licensing board.

The amendment to the penal code covering telephones makes it a misdemeanor to refuse to yield or surrender the use of a party line in order to permit the reporting of a fire or summoning police, medical or other aid in cases of emergency. The amendment also provides that telephone directories must carry a notice explaining the offense. Failure to yield party lines in the past has resulted in some tragic consequences.

New Liquor Law Effective Sept. 18

A warning that strict enforcement has been promised for a new law affecting teen-agers possessing liquor in automobiles was issued today by the Michigan Liquor Control Commission.

The law becomes effective September 18, and the commission calls attention to the people of the state, especially those who have minor children, to the amendment adopted by the 1952 Legislature.

Police and sheriffs' departments will institute a campaign of rigid enforcement and prosecuting attorneys will seek severe penalties at the request of the Liquor Commission.

"We feel," the Commission explained, "that enforcement of this law will do much to reduce the number of motor vehicle accidents caused by minors who have been drinking and driving, and also will suppress drinking by minors in parks, around dance halls in rural areas and at drive-in's in urban communities."

The law effective September 18 makes it a misdemeanor for any person under the age of 21 to purchase or knowingly possess, transport or have under his control in any motor vehicle, beer, wine, whiskey or other spirits.

The penalty is 90 days in jail or $100 fine or both.

In further commenting, the Liquor Commission said:

"This law has been interpreted to mean that the minor driver of any automobile can be arrested and charged with a misdemeanor if any alcoholic beverage, including beer or wine, is found in the car he is driving, regardless of whether he made the purchase.

Even though it is not his car, the driver will be subject to prosecution if any alcoholic drinks are found, whether they were bought by him or brought into the car by a passenger. The mere presence of alcoholic beverages in the automobile with the knowledge of the driver will be prima facie evidence of guilt."

The law exempts minors working for a licensee of the Liquor Control Commission and "possessing, transporting or having such alcoholic beverages in a motor vehicle under his control during his regular working hours and in the course of his employment."

In an attempt to warn all youths affected, and their parents, the Commission is seeking widespread publication of its announcement.

In addition, letters and bulletins about the new law are being sent to all high school principals and officials of colleges and universities, asking that notices be posted on bulletin boards and supervisory personnel call attention to the penalties for violation, as well as the careful enforcement program which has been planned beginning with the effective date.

The Servicemen's Letter

Hi Fellas:

Last week I carried on about the club that is sending these papers to you and all the time I was naming the club wrong. The proper name is "Community Service Club". Is seems that for this time at least I was about as confused as other people who you talk with about all of these community clubs and chests thaht are being promoted.

Congratulations to Niles Hill on receiving another stripe. Niles is now Cpl and has made the grade for the first string football squad from his camp. This Saturday they play against Bremington Navy in Seattle, Washington. Niles says that he thought he was pretty big but when he gets up alongside of the beef they have in those Navy teams he feels pretty small. Niles is with Co F, 369 EASR, Fort Worden, Washington.

Bob Graham has a change of address within the same camp. His new address is: Pvt. Robert C. Graham, RA 16 417 451, Btry B, 58th AAA AW Bn, 5th Armored Division, Camp Chaffee, Arkansas.

The Public Information Office at Camp Chaffee sent along an article on Bob Graham this week and also one on Dick Sommerville. Here they are. "Pvt Robert C. Graham has been selected to attend the 5th Armored Divisions clerk-typist school. During the eight-week school, he will take 22 courses on Army Administration, plus a complete course in typewriting." And the one about Dick — "Pvt Richard E. Sommerville, has been selected to attend the 5th Armored Division's radio operators school. During the 12-week course Pvt Sommerville will receive ten weeks of classroom study. His final two weeks will be spent in the field in practical operation of code and voice radio sets."

Stanley Antoine has finished his Basic at Lackland AFB and has moved to this new address: A/3C Stanley Antoine, AF 16 417 102, Sqd 3751, Brks 897, Sheppard Field, Wichita Falls, Texas. What are they lining you up for, Stan? Radio or mechanics?

After losing trace of Alfred Hosler in Fort Custer we've located him down in Camp Atterbury. His address now is: Pfc Alfred D. Hosler, RA 16 366 045, Co G, 167th Infantry, Camp Atterbury, Indiana. Al, in case you get lonesome for someone from home you can find Everett Vermillion over in Co C, 467 Chemical Mortar Bn. I don't know whether you know him or not but he's a good East Jordan rooter.

I have word here that Ellery Inman is home this week.

Here's a new address — A/B James E. Raymond, AF 16 425 729, Flight 1053, Sqdrn 3707, Lackland AFB, San Antonio, Texas. Jim went in with Dave Vallance on August 18th and has just now reported in. I presume that Jim and Dave are near each other but just to make sure that Jim finds the others down there here are their addresses: Dave Vallance is in Flight 1049, Sqd 3706 — and Bill Anderson is in Flight 1070, Sqd 3703. Here's hoping you three men have time enough to get together once or twice before finishing basic at Lackland.

The Marines have landed — in the person of Dave Wade. Dave has finished his electronics training in Memphis at the NATTC there and is now home on an 18 day leave enroute to El Toro, California — the old stamping grounds of Bud Strehl. He is due at El Toro on October 5th. Have you any tips to give Dave about his new duty station, Bud? Dave says that this electronics training that he just completed is a pretty tough course. They taught operation, maintenance, and construction of all types of electronic equipment from simple radio up to radar. He was just a little disapointed in the ratings they are handing out too. Dave is still Pfc when he figured he should be a buck at least.

Jerry McKenney and Wayne Flora are both home now. Jerry was in last week to give a little of the low-down on how much longer he is going to be tied up the Army and just when he expects to be free (?) civilian again. He is is now home on a 22 day furlough that will end on Oct. 2nd, when he is supposed to report back for duty. He is due to receive his discharge sometime around October 12th — depending on when the Army gets all the red tape out of the way. Jerry says that he has had all of the GI life that he wants. He doesn't like those other guys shooting at him. No thirty year man for him. I can't say I blame him. We can use another good farmer around here.

Glen Persons checks in from Norfolk with the following letter: "Hi Jake — I made up my mind tonight that I was going to drop you a few lines if it killed me — so here goes. As you can on this workhorse of the Navy. Getting to be an old-timer on here now. When I came aboard sixteen months ago about ninty percent of the crew were reserves and by now have gotten out. So us guys who came aboard then are the old-timers on the tub.

'I see by last week paper you said I was expecting to go to Germany. It was a silght mistake as we had just gotten back when I went home for that weekend. We were gone a month, but only in "Bremerhaven" for three days, as the rest of the time was spent traveling. I only had one liberty there, but from what I saw, Germany is a beautiful country. I have been in quite a few foreign countries since I came in here, but have yet to find one any cleaner or prettier. It would take a lot to beat these people as far as cleanliness is concerned. I might add that as a whole the people were very friendly. Of course you can still see resentment in some of their eyes, but that has to be expected.

'While I'm on the subject of this trip I would just like to mention the beautiful sight it is to enter the English Channel and be able to view the "White Cliffs of Dover". You have probably seen them and can back me up when I say it is one of the most beautiful sights a person could see.

'Before we left for Germany we spent about five weeks down in "Guantanama Bay" Cuba on a retraining course after coming out of drydock. The cruise was pretty rough as it meant a lot of G.Q., General Drills and etc. We spent the 4th of July weekend in Kingston, Jamaica, which was very nice. We took some of the men and their wives, who are stationed on the base at "Gtmo" with us. I never thought, when I came in the Navy, that we would be carrying women, but as I've always said, "In here — anything can happen".

'We are leaving Friday for a two months operation in Vieques, Puerto Rico so you can keep sending my paper Air Mail, which incidentally is really swell service. It makes the distance from home seem a lot shorter when you can have your paper two or three days after it's printed.

'I'm still up here on the "Singnal Bridge". We haven't heard yet whether we passed our test for third class or not, but here's hoping. When there is matrimony in the air a fellow can use that extra money. (yes man)"

Thanks for the interesting letter, Glenn. I can't back you up on that White Cliffs stuff though. You see, both times that I was in the channel it was so foggy that we couldn't see more than a couple of hundred yards. I guess I missed a beautiful sight. About "Tuck Thompsons address — I've had the same experience as you. Our papers have been returned also. And to date we have had no further word on him. When I get another line on him you'll hear of it right away.

We here in East Jordan were all saddened this week by the news of the untimely death of Robert Nemecek. Bob was killed in an automobile accident while on pass from Camp Polk. I'm sure all of you servicemen will join with us here at home in extending our utmost sympathy to Bob's family.

Hard Dough Stage Best For Cutting Corn For Storage

For the highest yield of good quality silage, corn should be cut when the grain is in the hard dough stage and when most but not all of the kernels have dented.

That's the advice of E.C. Rossman, farm crops department researcher at Michigan State College. He also says that corn should not be picked for cribbing until the ears have dried down to not more than 25 to 27 percent moisture for the best yield of high quality grain.

Corn can safely be picked for cribbing in narrow cribs, about 4 feet wide, at about 25 percent moisture. When picked and cribbed at a high moisture content, there may be spoilage, especially when the temperature is above freezing. Corn at 30 to 35 percent moisture may be safely stored if artificially dried before cribbing.

Back to the silage subject, Rossman explains that if corn is cut when the grain is in the hard dough stage and most of the kernels have dented, the total moisture in the plant will be enough for preservation of good silage. At that time the grain will contain about 45 to 50 percent moisture and the fodder will contain 75 to 80 percent water.

Cutting corn for silage before this stage results in less grain in the silage and less total dry matter per acre. If harvested too late, the silage may be too dry and difficult to preserve without spoilage.

Leave safety shields off your machinery if you want to get all wrapped up in your work.

The Raccoon

Racoon, pirate, pet, predator, prize or pest. So varied are the relationships between men and racoons that you may take your choice for a single designations. Teddy Roosevelt built his Bull Moose party about a wild animal. This being an election year we found Senator Kefauvers following his example and using the coon skin cap as campaign symbol. The fate of the Senator's ambitions matters little to the coon who seems able to survive dogs, traps, civilization, fire, hunters and almost anything. Even the rage of college boys for coon skin coats did not wipe the animals out of their range over our whole country.

When a country boys in his early spring wanderings finds what look like the prints made by little 2 x 4 inch hands in the mud along the creek he has a hunch that the coons have come

out of hibernation. If he is a careful observer he looks for one track of a woodchuck rather than a coon.

Raccoons breed in February just after coming out of their hibernation. In 63 days two to six young are born of the union and both parents take part in the success of the little family which may remain as a group through the first winter. By the first winter a young coon may have reached a weight of 12 pounds. Two hundred acres of suitable woodland should yield an animal crop of one raccoon in spite of the normal accidents of nature. A full meal may be about ½ pounds of fish but it may be an equivalent in crayfish, insects, sweet corn or vegetables. We hope this clown of our neighborhood never vanishes off our home range. If he does we will move to his just for the fun of it. Without prejudice for or against Senator Kefauver's political future the National Wildlife Federation of Washington, D. C., this year elects his political symbol, the raccoon, to its 1952 Hall of Fame — its remarkable popular wildlife stamp series. By E. Laurence Palmer.
